## MiHIA Reports for Tracking Progress

The Michigan Health Improvement Alliance (MiHIA), with the help of Conduent HCI, recently completed a series of reports to track their THRIVE workgroup metrics with a focus on healthcare, well-being and a vibrant economy. Along with the [regional scorecard report](#), MiHIA created 14 county-level downloadable reports, with a page on [equity](#), a [map collection](#), and [tutorial resources](#) on how to interpret and utilize the data.

## Healthy Northeast Ohio Vaccine Ambassador Toolkit

The Healthy Northeast Ohio partnership created a robust page to serve as a [Vaccine Ambassador Toolkit](#) on their site [healthyneo.org](#). The page is rich with information and resources including: a collection of [COVID-19 vaccine readiness resources](#), vaccine clinic locations, facts about the vaccine, and a section that addresses misinformation related to the COVID-19 vaccine.

## Wake Health's New Community Impact Site

To communicate the strategic work of their Population Health Management team and their partners, Wake Health moved their HCI platform as an embedded platform to a new standalone website to create [CommunityImpact.WakeHealth.edu](#). The new site showcases how their data-informed programs address each hospital service area's priorities. Wake Health also created a new page that provides an overview of Population Health Management, how success is achieved, and how internal teams work together to support their community.

If you have stories or tools you'd like to feature or learn how to make changes to your HCI platform, please reach out to your account manager.
